### Spectacular dipping system

Spectacular is how the new Gildewerk dipping system can be described. It's spectacular thanks to the high quality of the candles that you can dip with it, and because of the astonishing simplicity of its operation.

A pump- and overflow system keeps the wax at a constant level, while the hand (or foot) operated electric lift ensures consistent dipping action.

A traditional procedure that yields factory-like quality. When you use this system in combination with our Eco/Bio waxes, you'll create unique candles that have never been seen in shops before.

**Incidentally, the electric lift can also be used in combination with our range of Juniors.**

DMC-00200	Constant Level Dipping canister	€ 2.995,-
DMC-00100	Electric lift	€ 2.945,-
DMC-00020	Combi 2 base	€ 1.539,-

Together: € 7.479,-

## Paint for the painting of glasses

Gildewerk's range contains a number of glasses, and now you can add your own touch to these. We now stock 8 paint colours that you can use to distinguish your products from others. After painting, simply fire the glasses in a domestic oven set to 150 degrees. This paint is water-based, but once fired, it will stick permanently to the glass.

VER-01070	Green	100 ml	€ 6,95

### Mottling effect

Sometimes you want it to work and it doesn't, while at other times it just happens spontaneously. A strange cloud in your transparent candle. Now you can control this effect by adding mottling effect to the paraffin. It comes in liquid form and must be added to hot wax at a 5-10% ratio. Make sure that you get advice about the colour that you'd like to add to your candle, because the effect doesn't work with certain colours. Ask for our special Mottling effect colours.

### Wood Wick

Nothing looks better in an Eco- or Bio candle than a wooden wick. We've made them available. They burn very well and make a soft crackling sound like a small campfire. Incidentally, they can also be used for making regular paraffin candles.

## SOAP MAKING

### Ready-made shower gel

We've set up a special filling unit in France, and you can expect more and more products to be available from here. The idea behind this is to make it easier for you to start producing soap. Because you can order ready-made products from here, you can take on large orders that you'd otherwise have to refuse. Of course, it will always be less expensive if you fill your own bottles. We start with 10 fragrance/colour combinations in 250 ml bottles, tall.

Please ask about the possibilities for a delivery with your own label (private label)

## SOAP MAKING

### Aroma base and Aroma sticks

Unlike their name suggests, these sticks don't have any fragrance to start with. However, when you dip them in a special liquid – the Aroma base – to which you can add perfume oil, they absorb the fragranced liquid. This slowly evaporates, giving the whole area a delicious aroma. The sticks are available in two thicknesses. They are 70 cm long.

ZAT-01001	Aroma sticks 1 per 25 pcs	€ 2,95
ZAT-01002	Aroma sticks 2 per 25 pc	€ 3,95
ZAT-02001	Aroma base per l	€ 7,95

### Bottle Carree

The 'finishing touch' is a nice bottle. Our bottle 'Carree' is square, the content is 100 ml and the height is 90 mm.

		price per piece
